- Junior Web developer able to build a Web presence from the ground up, from concept, navigation, layout and programming to UX and SEO.
- Detail oriented fast learner, hard worker, and team player who is proficient in an array of scripting languages and multimedia Web tools.

Technical Skills

Languages: Proficient in CSS and HTML with a strong working knowledge of JavaScript, Python, and PHP.

Additional Web Skills: Creating and customizing Wordpress themes and plugins, Bootstrap, jQuery, JS animations with GreenSock, Gimp, and Mobile first web design.

Digital Production: Professional knowledge of the digital audio workstations Ableton and Protools.

Web Development Experience

Mingeiarts.com - Web Developer, 2014 - Present

Responsible for the redesign and maintenance of an eCommerce website.

- Redesigned the Wordpress theme to bring the store's taxonomy to the home page creating an easier and faster way to find products to shop for.
- Added the option to place sold products into an archive that can easily be viewed for educational purposes since many of the products are one of a kind pieces of Japanese history.
- Added Jet Zoom javascript from starplugins.com to the product's pictures.
- Ability to address my client's needs in a timely manner and offer solutions to help better the UX within the theme's limitations as well as adjusting the PHP files to achieve their desired results.
- Creating a plugin to extend the functionality of Cart66 to allow an option for adding shipping insurance.

To Whom It May Concern:

This is a letter of recommendation for Max Cheswick, who has applied for the position in the field of front-end web development. I cannot think of anyone more suited to this position than Max. I have known Mr. Cheswick since the 2014, and after I retired as Director of the School of Design (Industrial, graphic design and architecture) at Arizona State University and owning my own product design business.

First of all, Max has always possessed a positive attitude for the interface between website design through programming and technology. His extensive knowledge of HTML, CSS and JavaScript is exceptional. This distinction is something that Max is becoming known for in the regional professional community. He continues to keep abreast of the industry and data technology such as PHP and python programming languages, and incorporates this knowledge to server his clientele with the highest standards and experience. He is sensitive to the most current technological standards in creating and modifying themes in Wordpress, knows the importance of function of programming, and compliments site function and appearance based on that knowledge and experience. Max was specifically hired by my business to create a functional web design through computer programming and data-driven programming skills, thus bringing to life data that matches the original design concept. Max is extremely ethical and has the highest professional standards.

In my opinion, there is no one more qualified to deliver effective results than Max Cheswick. He is extremely creative, has excellent interpersonal skills, and most of all, has a passion for continued learning based on the challenges brought before him. Max is a team player and has the ability to bring diverse teams together in support of a common cause. Max has always had wonderful people skills and the knowledge and experience to move endeavors forward in a unified manner, through assessment at multiple levels. Max has my fullest respect and support for positions he feels his is qualified to accomplish.

Respectfully,

A handwritten signature in black ink, appearing to read "Robert Lee Wolf", written over a horizontal line.

Robert Lee Wolf, IDSA, AIGA, FIIDA
Emeritus Professor/Director
